

# 胃造口术 Gastrostomy

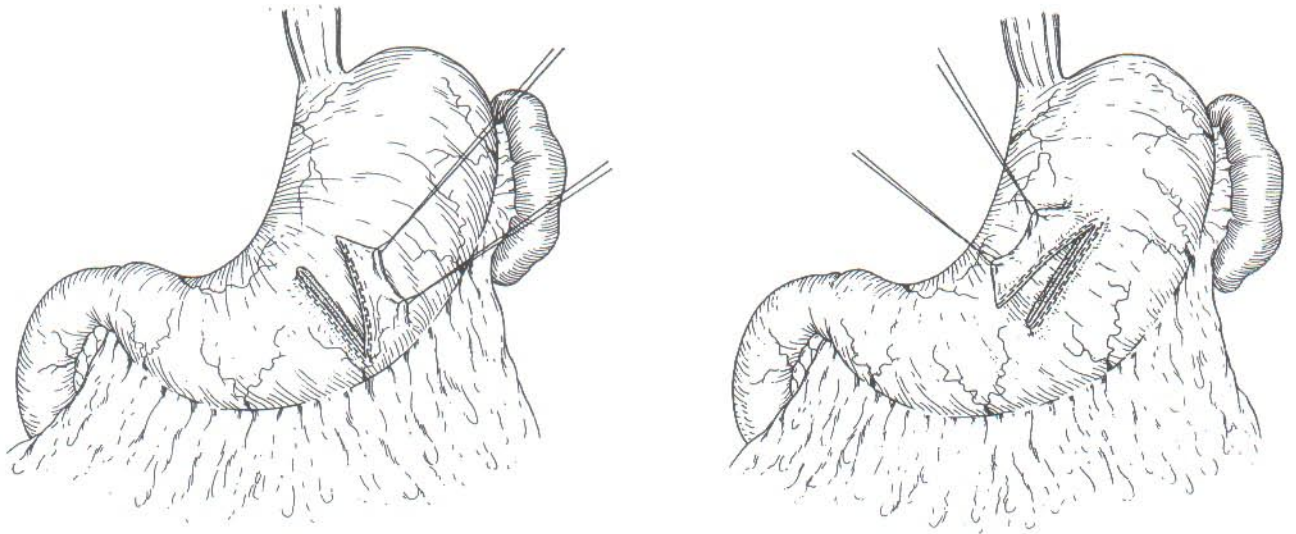

拟定腹壁上最佳的胃造口部位，决定胃的切离与缝合的位置和长度，用直线形切割吻合器进行操作。

Choose the most appropriate abdominal site for gastrostomy. Decide the location and length of gastric resection and stapling. The procedures are done with a linear cutter.

为安全起见，进行胃浆肌层加强缝合。

The gastric seromuscular layers are sutured for the purpose of reinforcement.

根据关腹后腹壁最佳胃造口部位，用直线形切割吻合器改变缝合、切离的位置。

According to the most appropriate abdominal site for gastrostomy after the closure of abdomen, the location of the stapling and resection can be changed with the linear cutter.
